Portfolio: [davidwhang.com](https://davidwhang.com)

### Technical Skills

**Strong:** HTML5, CSS3, Javascript, jQuery, Bootstrap, Github, AJAX

**Experience:** Angularjs 1.5, Webpack, NPM, React, Nodejs, Redux, Sass

### Applications Developed

#### Ramrod [Demo Github](#)

- With the collaboration of 5 developers, created an application that finds the most relevant youtube video of an artist's music, tweets about them, and all the venue's they performed at in California.
- My contribution was the functionality of the youtube **API** using **Javascript** and **jQuery**, the creation of **Bootstrap** layout and all the functionalities with the interaction of the DOM.

#### Scooby-Doo Memory Match [Demo Github](#)

- This is a web application 18 card game that was created based on memory match with a theme of Scooby-Doo.
- Through the use of **Javascript** and **jQuery** a game board is dynamically created, with each matching pair creates a different interaction with the DOM.

#### React Weather App [Demo Github](#)

- Through the use of the **React** framework, created a weather app that gives you the temperature of the selected location. The styling was done in foundation and Sass.

#### Student Grade Table [Demo Github](#)

- This application is based on CRUD (Create, Read, Update, Delete), managing a database of students with corresponding assignments and grades. With **AJAX** calls dynamically updating and deleting the information.
- **HTML5** and **bootstrap** was used to build the skeleton and style this management tool.

### Professional Experience

#### Packtogo, Buyer

Anaheim, CA 2015-2016

- Created company guidelines in building a business through Amazon and other traffic channels.
